### Let's Start!

What online HTML editor do you recommend?

#### Learning Outcome:

Describe common simple incidents at work in a simple spoken or written situation with a supportive interlocutor.

Represent the solution outline to the problem presented by the customer through making case of use diagrams, facing the problem to the customer following rules and protocols of the organization.

#### Ask your partner:

- Why do web developers need HTML editor?
- What kind of features does an HTML editor normally offer?

#### Can Do Statements:

- I can talk about a free online option for HTML editors.
- I can present different characteristics to find in a free online HTML editor.
- I can discuss how to use a demo for an HTML editor.

### Let's Explore!

Some students are in a lecture about HTML editors.

*Instructions: Read the text below.*

**Lecturer:** Good morning, everybody. Today, we are going to continue talking about HTML editors. Let's start by having a round of questions to solve general doubts. Who would like to start?

**Student 1:** Me, sir. Can a website be made with a free online editor?

**Lecturer:** Yes, there are many free online HTML editors that offer different interactive features for website developers.

**Student 2:** What kind of features can be found in those editors?

**Lecturer:** Well, most of free online editors offer the same features as paid versions, except for variety of color scheme or uploading options. There are many services such as syntax highlighting, indentation, HTML cleaning and file conversion.

**Student 1:** Does HTML cleaning refer to source cleaning options?

**Lecturer:** Absolutely, there is generally an option in which invalid code can be fixed.

**Student 2:** What online editor do you recommend?

**Lecturer:** There's one I usually suggest to my students; it is [html-online.com](http://html-online.com). It offers a lot of functional features that can be used online. The only failing in this editor is the absence of a Lorem-Ipsum generator.

**Student 1:** Can this editor be downloaded?

**Lecturer:** There's no need, you can work on it in any internet browser. What I recommend is to experiment with the editor's features before start working on website content.

**Student 2:** How do we have to use it normally?

**Lecturer:** Well, once you open the page, you can find two editors together. First, there is a visual editor where the website content can be seen and, on the right side of the screen, there is a source editor where the HTML source code appears. Then, above the HTML editor, there are some basic commands on the control panel to adjust font size, delete data with the undone button, pick colors or start a new document.

**Let's Practice!**

Carolyn discusses with a Developer about how to use a demo for an HTML editor.

*Instructions: Select the correct option to correctly complete each sentence.*

1. Carolyn: \_\_\_\_\_ this demo editor be downloaded?
  - a. can't
  - b. can
  - c. can be
2. Developer: There's no need, you \_\_\_\_\_ on it in any internet browser.
  - a. can work
  - b. can be work
  - c. can't work
3. Carolyn: Thanks, now I know that \_\_\_\_\_ a demo editor where the HTML source code appears.
  - a. I cannot find
  - b. I can to find
  - c. I can find

**Let's Practice!**

Now, Carolyn is talking about a free online option for HTML editors.

*Instructions: Complete the sentences by writing its corresponding word. Use capital letters where necessary. Use: can be found, can be used, Can this, Can HTML cleaning refer, Can a website be.*

1. \_\_\_\_\_ made with a free online editor?
2. What kind of features \_\_\_\_\_ in those editors?
3. \_\_\_\_\_ to source cleaning options?
4. It offers a lot of functional features that \_\_\_\_\_ online.
5. \_\_\_\_\_ editor be downloaded?

## Extension Activity

Let's write a list of HTML editors!

*Instructions: Complete the following steps. Fill in the Self-Assessment.*

- Look for information about used HTML editors.
- Classify the editors that you found according to their advantages.
- Write a list with the information you looked for and present it to your class.

### Self-Assessment

Yes

No

- I look for information about HTML editors.
- I classify the editors according to their advantages.
- I present my job to my class.

☐ ☐
☐ ☐
☐ ☐

## Target Words

- **lorem-ipsu**m generator (noun): a tool that simulates possibilities of text layout in a website.  
e.g. The only failing in this editor is the absence of a Lorem-Ipsu generator.
- **browser** (noun): a computer program that allows to navigate, look for information and interact on the web.  
e.g. There's no need, you can work on it in any internet browser.
- **control panel** (noun): a set of commands to have easy access to a program features.  
e.g. Then, above the HTML editor, there are some basic commands on the control panel to adjust font size, delete data with the undone button, pick colors or start a new document.
- **html cleaning** (noun): a tool to correct html source code.  
e.g. There are many services such as syntax highlighting, indentation, HTML cleaning and file conversion.
- **file conversion** (noun): an application to transform different types of file formats into html source code.  
e.g. There are many services such as syntax highlighting, indentation, HTML cleaning and file conversion.
- **failing** (noun): a weakness of something.  
e.g. The only failing in this editor is the absence of a Lorem-Ipsu generator.

## Learning Points

### Modal verb Can for Ability: Interrogative Statements

You usually use the *modal verb can* when you are referring to the abilities or functions of someone or something.

Another structure using the modal verb *can* to talk about abilities is *can + be + past participle* of the main verb. You can use this structure when the subject of the sentence (the one doing the action) is implicit, not mentioned or when it's not necessary to mention it. Look at the examples:

Emphasis on the subject (Active):

- People *can make* websites online.
- *Can* people *make* websites online?

Emphasis on the object (Passive):

- Websites ***can be made*** online.
- ***Can*** websites ***be made*** online?

| <b><i>Modal Verb Can in Passive Statements</i></b> |                   |                 |           |                                           |                   |
|----------------------------------------------------|-------------------|-----------------|-----------|-------------------------------------------|-------------------|
|                                                    | <b>Modal verb</b> | <b>object</b>   | <b>BE</b> | <b><i>Past participle of the verb</i></b> | <b>Complement</b> |
| <b>Interrogative</b>                               | <i>Can</i>        | <i>websites</i> | <i>be</i> | <i>made</i>                               | <i>online?</i>    |

### Examples

- *Can a website be made with a free online editor?*
- *Can this editor be downloaded?*

## Learning Points

### There is and There are to Talk About Features in an Online HTML Editor

When you want to express the idea of the existence of something or you need to describe the features of an object, you can use the structures *there is* and *there are*.

You use ***there is*** to refer to singular or uncountable nouns, and ***there are*** to refer to plural nouns:

- *There is* an HTML source code editor on the right side of the page.
- *There are* different kinds of features in the control panel.

You can make the forms ***there is*** and ***there are*** negative by only adding the word ***not*** after the verb to be, or by contracting the verb to be combined with the word not: ***isn't*** or ***aren't***.

- *There isn't* an HTML source code editor on the right side of the page.
- *There aren't* different kinds of features in the control panel.

The interrogative form used to ask for details in the information is:

- *Is there* an HTML source code editor on the right side of the page?
- *Are there* different kinds of features in the control panel?

### Examples

- *There are many free online HTML editors that offer different interactive features for website developers.*
- *There are many services such as syntax highlighting, indentation, HTML cleaning and file conversion.*
- *Absolutely, there is generally an option in which an invalided code can be fixed.*
